DiSorb Systems manufactures and distributes a broad range of medical products, which are used in healthcare facilities throughout the United States and many countries around the world. DiSorb distributes products ranging from single-use disposable products to hospital beds.

DiSorb partners with leading medical product manufacturers to distribute a growing portfolio of over 5,000 SKUs to serve our customers' healthcare requirements.

DiSorb is proud to be a small business with a nimble management structure with the facilities, capability and experience to fill single orders ranging from \$100 to \$3,000,000. The Company accomplishes this by leveraging decades of medical industry relationships, an 80,000-square-foot state-of-the-art distribution center with inbound and outbound loading docks, rack locations for thousands of pallets, extensive material handling equipment, and attention to detail driven by its ISO9001:2015 certification.

In its first 15 years, DiSorb Systems exclusively served the private sector. In 2015, a federal strategy was implemented resulting in certifications from the Veterans Administration (CVE) as a Service Disabled Veteran Owned Small Business, from the Small Business Administration as a HUBZone Enterprise, as a DAPA Holder with the Defense Logistics Agency, as well as an FSS Contract Holder with the Veterans Administration.

DiSorb Systems is honored to maintain a workforce made up of 75% veterans. The company is headquartered in Philadelphia, PA, near all of the major roadways in Eastern Pennsylvania.
